

Intro to NLP

MIPT
3.02.2022
Anton Emelianov,
Albina Akhmetgareeva

Today

Intro

About the course

Recent trends in NLP

Practice: Basic text processing

Course instructors

Anton Emelianov, login-const@mail.ru, @king_menin

- * Ph.D. Candidate and Lecturer at Algorithms and Programming Technologies dept, MIPT,
- * R&D NLP, SberDevices, Sber.
- * RussianNLP team member.
- * Linkedin: https://goo.gl/M5UtBr

Albina Akhmetgareeva, albina.akhmetgareeva@gmail.com, Tg: @colindonolwe

- * Master degree in Computer Science, MIPT
- * R&D NLP, SberDevices, Sber.
- * Linkedin

https://www.linkedin.com/in/colindonolwe

Course information

- Github repo: https://github.com/king-menin/mipt-nlp2022
- Tlg chat: https://t.me/+oKrpfmFaGqQ00Dky
- Final mark: score(HWs)/count(HWs)*10 or exam
- Homeworks: ~3, anytask coming soon

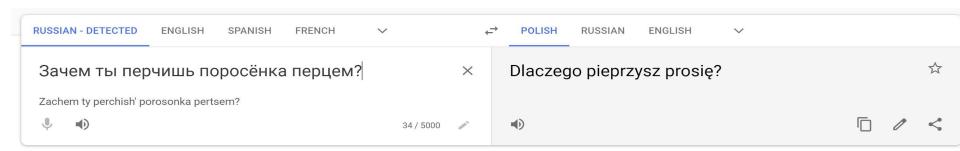

Natural language processing

 Natural Language Processing (NLP) is a one of the most interesting and research intensive fields of modern Artificial Intelligence. Obviously NLP has a lot of industry and business applications.

Course Structure

Course structure			
Num	Title	Practical	
1	Intro to NLP	Basic text processing	
2	Word embeddings	Word2vec, text classification	
3	RNN, CNN, text classification	LSTM, CNN	
4	Language modeling, Part 1	Named entity recognition (NER)	
5	Seq2Seq and machine translation	Seq2seq	
6	Language modeling, Part 2 - attention, transformers		
7	Transfer Learning in NLP	Transformers model for classification	
8	Syntax parsing	Syntax parsing	
9	Question Answering		
10	Summarization and Simplification		
11	Real cases and trends		
12	TODO	6	

Machine translation

Classification

- Spam filtering
- Sentiment
- Topic or genre

Clustering texts

Information extraction

- Facts
- Events
- NER

Character level:

- Tokenization: splitting text into words
- Splitting text into sentences

- Word level morphology:
 - Parts of speech tagging
 - Removal of morphological ambiguity
 - Normalization/lemmatization
- Problem: morphological ambiguity

- Sentence level syntax:
 - Allocation of noun or verb groups (chunking)
 - Allocation of semantic roles
 - Trees of components and dependencies

49/5000

×

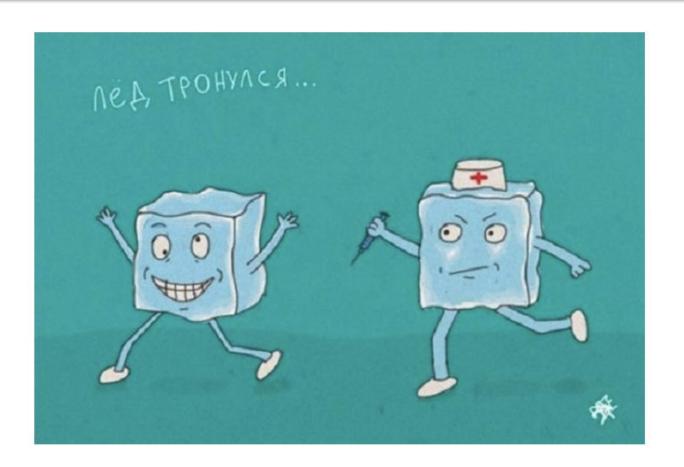

- The level of meaning semantics and discourse:
 - Resolution of coreferents
 - Analysis of discourse links
 - Allocation of synonyms, hyperonyms
 - Analysis of semantic links
- Problem: ambiguity of words

Ambiguilty of words

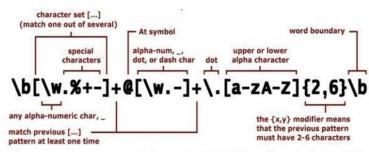

Ambiguilty of words

Text processing methods

Formal rules

- Regular expressions
- Formal grammars
- Systems of rules

Parse: username@domain.TLD (top level domain)

Type of Reflection	Rule
Reflection in the x-axis	$(x,y) \rightarrow (x,-y)$
Reflection in the y-axis	$(x,y) \rightarrow (-x,y)$
Reflection in the line $y = x$	$(x,y) \rightarrow (y,x)$
Rotation of 90° counter-clockwise about the origin	$(x, y) \rightarrow (-y, x)$
Rotation of 180° about the origin	$(x, y) \rightarrow (-x, -y)$
Rotation of 270° counter-clockwise about the origin	$(x,y) \rightarrow (y,-x)$
Translation by a vector	$(x,y) \rightarrow (x+a,y+b)$

2. $S \stackrel{1}{\Rightarrow} aB \stackrel{6}{\Rightarrow} abS \stackrel{2}{\Rightarrow} abbA \stackrel{5}{\Rightarrow} abba$.

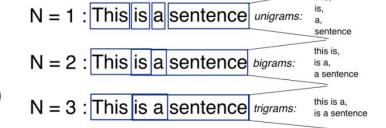

3.
$$S \stackrel{2}{\Rightarrow} bA \stackrel{5}{\Rightarrow} ba$$
.

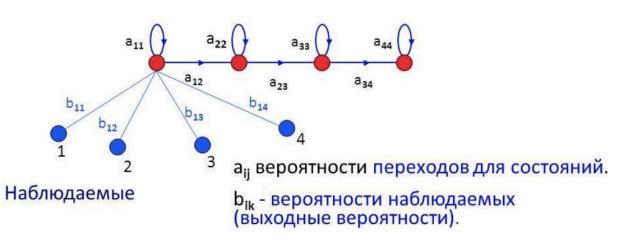

4.
$$S \stackrel{2}{\Rightarrow} bA \stackrel{4}{\Rightarrow} bbAA \stackrel{5}{\Rightarrow} bbaA \stackrel{5}{\Rightarrow} bbaa.$$

Text processing methods

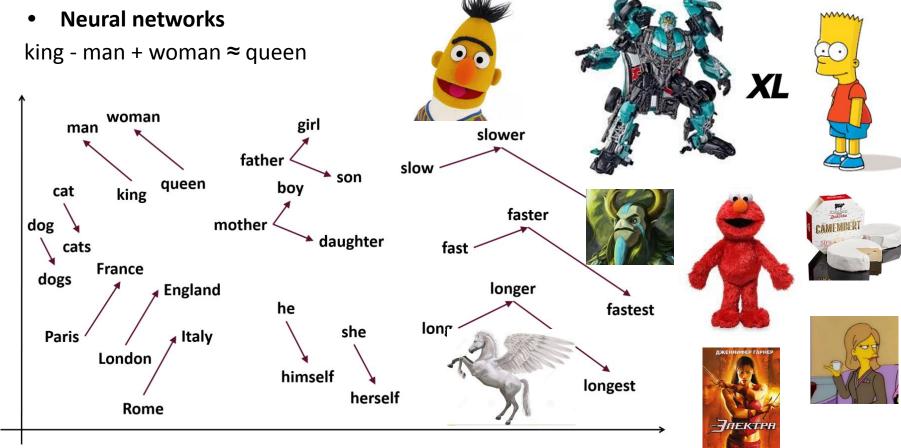

Statistical models:

- n-gram language models
- Hidden Markov Models (HMM)
- Markov models of maximum entropy (MEMM)
- etc.
